

St. Sava Camp

2022 COVID Protocols ~ Updated June 19, 2022

Thanks to the wise guidance set forth by the CDC, American Camp Association, local & state authorities, and the medical professionals advising us, we are hopeful to keep a safe and healthy camp for 2022.

*All COVID Guidelines are subject to change based on the latest recommendations of our medical advisors.

Check-In at Camp

When a participant (vaccinated or unvaccinated) arrives at camp, all participants must:

- Provide written documentation of negative COVID test performed within 24 hours of arriving at camp OR if the participant has tested positive for COVID-19 in the past 3 months, provide written documentation of that positive test.
- If you arrive without proof of a test, you will be given a test before registering. If you test positive, you will not be permitted to stay.
- Agree to the COVID Informed Consent Agreement (or previously agreed to it during registration).

If you have had any known exposure within the past 5 days, or a sign of any symptoms, medical staff must determine whether it is safe for a camper to attend camp based on the symptom checklist. Each camp medical staff should ask the following verbal questions to all participants:

- *Have you experienced any of the following symptoms in the past 48 hours:*
 - *fever or chills*
 - *cough*
 - *shortness of breath or difficulty breathing*
 - *fatigue*
 - *muscle or body aches*
 - *headache*
 - *new loss of taste or smell*
 - *sore throat*
 - *congestion or runny nose*

- *nausea or vomiting*
- *diarrhea*
- *Are you isolating or quarantining because you tested positive for COVID-19 or are worried that you may be sick with COVID-19?*
- *Have you been in close physical contact* in the last 14 days with:*
 - *anyone who is known to have laboratory-confirmed COVID-19?*
 - *anyone who has any symptoms consistent with COVID-19?*
- *Are you currently waiting on the results of a COVID-19 test? Important: answer "no" if you are waiting on the results of a pre-travel or post-travel COVID-19 test.*
- *Have you traveled* in the past 10 days? *Travel is defined as any trip that is overnight AND on public transportation (plane, train, bus, Uber, Lyft, cab, etc.) OR any trip that is overnight AND with people who are not in your household.*

Masking

- Masks are no longer required at camp, however, individuals may still choose to wear a mask based on personal preference.
- If a participant displays COVID-19 symptoms while at camp, they may be asked to wear a mask while the medical staff evaluates them for COVID.

Daily Check-In

- If any participants show any of the symptoms listed above, they should report to the camp medical staff immediately.

Camp Activities

- Activities will be held outside as often as possible.

What if someone contracts COVID-19 while at camp?

- Any individual who is suspected to have COVID-19 will be tested by the camp medical staff who are following infection control measures. The nurse will also determine the prescribed care for the individual including whether to take the individual for a COVID-19 test offsite. If the individual tests positive, they will be isolated until he/she can be picked up by their parents.
- If the individual is a camper, parents/guardians will be notified immediately by the Health Center staff and they will be asked to come

pick up the camper immediately. An email will also be sent to all the families of that session to notify them and inform them of the measures being taken.

- If an individual returns home from Camp and tests positive within 5 days post-camp, The camp staff will notify the families of any potentially exposed individuals.

After Departure

- Monitor for symptoms and avoid immediate contact with high-risk individuals after returning from camp.
- If you test positive for COVID-19 immediately after returning from camp, please notify the Camp so that we can start contact-tracing procedures and reduce transmission risk for other families.
